

scripts/sync-tracker-sdk-mirrors.sh — User Guide

Last verified: 2026-05-15 (1.2.23 closure-cycle, §6.AD-debt task #61 backfill)
Inheritance: HelixConstitution §11.4.18 (script documentation mandate)

Overview

Stub doc generated from the script's in-source header comment. See `scripts/sync-tracker-sdk-mirrors.sh` for canonical behavior. This stub exists so the CM-SCRIPT-DOCS-SYNC pre-push gate (`.githubhooks/pre-push` Check 9) starts gating modifications to this script.

The script's own header documentation (verbatim):

```
scripts/sync-tracker-sdk-mirrors.sh
Pushes the submodules/tracker_sdk/ working tree to its 2
configured upstreams
(GitHub + GitLab). Local-only – no hosted CI invoked. Operator-
controlled.
```

```
Only GitHub + GitLab per constitutional clause §6.W (added
2026-05-08).
```

Usage

See the script's in-source comment block (above) for canonical usage examples.

Maintenance

When this script is modified, update this document in the same commit (CM-SCRIPT-DOCS-SYNC requires it). Per §11.4.18, the documentation **MUST** stay in sync with the codebase — no doc may be out of sync with its script.
