

## **LVA-3 — Adopt HelixConstitution §11.4.79–106 (pin 53 commits behind)**

**Status:** In progress **Type:** Task **Severity:** P1

Pin 208e2c8 is 53 commits behind origin/main 883ccc1. Highest-impact new clauses: §11.4.93/95/106 (workable-items SQLite DB tracked in git + md to DB sync engine), §11.4.79 (own-org submodules in CodeGraph), §11.4.85 (stress/chaos), §11.4.98, §11.4.102. Pin-bump is operator-gated; decision owed on §6.AD.3 Path B vs SQLite DB. **Source:** self-discovered — .lava-ci-evidence/constitution-review/2026-05-31-68th-cycle-review.md

## **LVA-5 — Rotate Firebase CI token (printed to session transcript)**

**Status:** Operator-blocked **Type:** Bug **Severity:** P0

67th-cycle: the LAVA\_FIREBASE\_TOKEN default-expansion printed the token to the session transcript (NOT committed to git). Operator MUST rotate per §6.H clause 6 (firebase logout; firebase login:ci). **Source:** self-discovered — .lava-ci-evidence/sixth-law-incidents/2026-05-20-firebase-token-echo-leak.json

## **LVA-008 — C11 search\_input NavBackStackEntry teardown crash (nested-NavHost lifecycle)**

**Status:** In progress **Type:** Bug **Severity:** P1 **Created-By:** AI

Challenge11ArchiveOrgAnonymousSearchTest crashes the app PROCESS at activity-destroy: IllegalStateException 'State must be at least CREATED to be moved to DESTROYED' on the inner search/search\_input entry. Root-caused (2026-06-08): the inner nested NavController's host is the outer addNestedNavigation NavBackStackEntry, driven to DESTROYED out from under the inner controller while search\_input is still INITIALIZED. FALSIFIED on device: nav 2.9.1->2.9.8, LenientTeardownRule (uncatchable process death), atomic popUpTo replace. Feature WORKS (result row renders pre-teardown). Candidate fixes ranked in incident JSON (inner NavHost Activity-scoped LifecycleOwner; move search to outer NavHost; ON\_STOP pop). Forensics: .lava-ci-evidence/sixth-law-incidents/2026-06-08-navbackstackentry-teardown-crash-2.9.1-incomplete.json

## **LVA-036 — llm\_orchestrator github[?]gitlab pre-existing mirror fork (non-FF) blocks §6.W convergence**

**Status:** Operator-blocked **Type:** Task **Severity:** P2

github/master and gitlab/master diverged at d2a2151 with unique non-doc go.mod content each; LVA-030 commit landed gitlab+working-tree but github refused non-FF. Needs a content-merge decision (operator-gated, NO force-push per §6.T.3).
