80	P2	Fixed (→ Fixed.md)	Bug	—	LVA-093 — app/src/main/kotlin/di LavaApplication.kt:95-105 launch RepopulateProvidersOnStartupU fire-and-forget on Dispatchers.De Application.onCreate() – it is not digital/vasic/lava/client/MainActiv splash screen ONLY on local pref

#	Level	Status	Type	Fixed-In Tag(s)	One-line description
81	P2	Fixed (→ Fixed.md)	Bug	—	loading and has no dependency on search completion. Consequently the splash screen can reach the search screen while still inside core/domain/src/main/kotlin/org.kiwix.kiwixcore/RepopulateProvidersOnStartupUseCase.kt:flight. If the user searches during this time, the catalogue vendors that overlap with the provider id (rutracker/rutor/nnm) will be shown (e.g. gutenber - see core/tracker/client/di/TrackerClientModule.kt:the direct-to-site bundled client for the user's configured API endpoint). This is a real, narrow-window, self-healing bug. No existing test covers this use case in isolation and does not use Application.onCreate-to-first-intent window. CONFIRMED by static analysis (2026-08-10/11), part of the LVA-094 investigation that also found the skips-populateFrom test bug in Core.kt:Real-world frequency and user-visible. UNCONFIRMED without device instrumentation. Test was executed for this specific use case. Reading. Closure needs either (a) a Test that measures or deliberately fails correct provider resolution once (b) a product decision to gate the onboarding on repopulation completion (with a race condition instead of racing it). LVA-094 — RepopulateProvidersOnStartupUseCase cold-start provider-catalogue fetch failure: RepopulateProvidersOnStartupUseCase returns false with no user-visible error. No own fetch-failure path, which surmounts PROVIDER_CATALOG_FALLBACK. This is a bug in other production code path re-investigation. rest of that process's lifetime. Confirmed in production call sites for populateProvidersOnboardingViewModel.kt:950-999. This is a startup use case (app cold start) and no connectivity-change listener. This is a transient failure at exact boot time. This is associated, VPN/Wi-Fi still connected. This is unreachable LAN lava-api-go/api-go. This is who configured a non-bundled API. This is onboarding silently falls back to local.
