

scripts/gen-script-doc.sh — User Guide

Last verified: 2026-05-15 (1.2.23 closure-cycle, §6.AD-debt task #61 backfill) **Inheritance:** HelixConstitution §11.4.18 (script documentation mandate)

Overview

Stub doc generated from the script's in-source header comment. See scripts/gen-script-doc.sh for canonical behavior. This stub exists so the CM-SCRIPT-DOCS-SYNC pre-push gate (.github/hooks/pre-push Check 9) starts gating modifications to this script.

The script's own header documentation (verbatim):

```
scripts/gen-script-doc.sh – one-time generator for docs/scripts/
X.sh.md stubs.
```

```
Closes §6.AD-debt follow-up (task #61): backfill 19 missing
companion
docs so CM-SCRIPT-DOCS-SYNC pre-push gate (Check 9) starts gating
those
scripts too.
```

Usage:

```
  bash scripts/gen-script-doc.sh                # all
missing
  bash scripts/gen-script-doc.sh scripts/foo.sh  # only
this one
```

Idempotent: skips files that already have a doc.

Inheritance: HelixConstitution §11.4.18 (script documentation mandate).

Classification: project-specific (the generator output shape is Lava-side).

Usage

See the script's in-source comment block (above) for canonical usage examples.

Maintenance

When this script is modified, update this document in the same commit (CM-SCRIPT-DOCS-SYNC requires it). Per §11.4.18, the documentation **MUST** stay in sync with the codebase — no doc may be out of sync with its script.
