

Lava-API-App-0.2.13-28 — administrative parity bump + embedded dynamic-port fix

Previous published: Lava-API-App-0.2.13-27.

- No api-app Kotlin/Android source change — 27→28 was an administrative \$6.Y bump already applied on disk since 2026-08-14; this entry closes the CHANGELOG/snapshot gap for it.
- Embedded lava-api-go engine (liblavaapi.so) now carries this cycle's dynamic-port allocation fix: a real :8443 port collision with an unrelated process on a shared host, plus a genuine mDNS/Alt-Svc-before-any-bind ordering bug found while investigating it. Both fixed.

Build info

- App versionName: 0.2.13
- App versionCode: 28
- Distribution channel: firebase-app-distribution-api-app
