2	P2	Fixed (→ Fixed.md)	Bug	—	dispatch. Evidence: .lava-ci-evidence/helixqa/vm-qa-vision2-202606087 (4/4 reached vision+navigation, 3 FAILED on the launch-dispatch bridge errors anymore). LVA-010 — internal/router/router registers the /v1/:provider route without the provider-resolution middleware so those handlers panic-recover to production instead of resolving a Surface. Surfaced by the new router_test.go which asserts resolution (non-404 routes resolve but to a 500, not a provider dispatch. Confirm whether production wires the middleware (real server bootstrap) or this is a fake. Evidence: router_test.go note + internal/router/router.go.
3	P3	Completed (→ Fixed.md)	Task	—	LVA-011 — core/testing TestEndpointsRepository.add() stores Endpoint.Rutrackers and can raise a duplicate-conflict for it, but the real TestEndpointsRepositoryImpl.add() returns for Rutracker (if (endpoint.Endpoint.Rutracker) return) and stores it. A future test asserting ‘Rutrackers is a no-op’ would pass on fake while exercising different behavior than production — a latent §Third Law fake. Fix: add the Rutracker no-op doc to the fake. Flagged by the rat domain UseCase agent (2026-06-09).
4	P2	Completed (→ Fixed.md)	Task	—	LVA-012 — core/testing TestVisitedRepository, TestFavoritesRepository, TestBookmarksRepository have contains/add/etc methods that are unusable for behavioral wiring. TODO(‘Not yet implemented’) (these feature ViewModel tests (account rating) work around them with local memory fakes. Per the Third Law, shared fakes should be behavioral equivalent to the real repos so test them directly. Flagged by the rat VM-test agent (2026-06-09). Fix: the stubs as real in-memory fakes.

57	P3	Completed (→ Fixed.md)	Task	—	LVA-067 — LVA-052 scoped favorite topic downloads to the active-tracker default because the favorite/visited rows store no provider id; add a provider column + migration so an archive.org/gutenberg favorite routes to HTTP_DOWNLOAD.
58	P3	Fixed (→ Fixed.md)	Task	—	LVA-068 — tls.go only re-checks certs at Start; a multi-month-running error could serve a leaf that expires with restart. Add a periodic re-mint check.
59	P3	Completed (→ Fixed.md)	Task	—	LVA-069 — handleSseEvent raw-Java parsing (provider_start/results/provider_done/provider_error) and onRetryClick Error-state re-dispatch untested production branches.
60	P3	Completed (→ Fixed.md)	Task	—	LVA-070 — LVA-067 laid the provider Room column; complete it by throwing providerId through ToggleFavorite/AddLocalFavoriteUseCase/GetTopic + the Topic/TopicPage models (with TopicModel + favorites/visited side to openTopic(id,providerId) (read mirroring search_result).
61	P3	Completed (→ Fixed.md)	Task	—	LVA-071 — observeSseSearch internally constructs the SseClient with a https base; inject it so the full Sse Error to retry path is hermetically against a MockWebServer.
